#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 08 May 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spieth (DE 16 75 685 B) in view of Goddin (US 609,144 which corresponds to DE 98 395 C). Spieth discloses a threaded ring having first (8) and second (9) bodies with a gap (5 or 6) therebetween and discloses set screws (10) as an actuating means, for adjusting the geometry of the gap, each having a head received in a counter bore in the second component. Spieth does not disclose the shape of the threaded ring as claimed. In the embodiment of Figs. 1 and 2, Goddin discloses a one piece threaded ring having first (A) and second (B) body components with a gap (a) therebetween enabling an adjustment between the components to provide a thread lock. Goddin shows the ring as having a shape where the outer circumference of the second body is less than the outer circumference of the first body as well as the outer end of the gap. At the time the invention was made, it would have been obvious for one of ordinary skill in the art to change the shape of the threaded ring of Spieth to that disclosed in Goddin's embodiment shown in Figs. 1 and 2. The motivation for changing the shape is that Goddin discloses that two shapes are known to substitute for one another since Goddin shown in Fig. 3 a shape similar to Spieth.

***Response to Remarks***

Applicant's substitute specification is has been approved and is much appreciated.

As applicant arguments apply to the new grounds of rejection, applicant argues that Spieth and Goddin are from different fields of endeavor noting that Spieth relates to a locking ring and not a nut as Goddin. In response, the examiner disagrees because the so called "locking ring" of Spieth is ultimately also a nut, only its for a specific use and Goddin does not specify a use which would make it incompatible with that specified Spieth. Thus the skilled artisan concerned with the locking ring in Spieth would consider nuts which would be capable of performing in the same environment which would include Goddin.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
